We are a specialist provider of accredited telecoms training, with a focus on mobile, wireless technologies including 5G, 4G, VoLTE, Wi-Fi and more.

Whether you are an individual looking for training or whether you are part of a team or larger organization, we have delivery options and courses to suit everyone.
Who we are:

Established for over 17 years, our staff jointly have over 100 years of telecoms training and development expertise. We are renowned for our innovative learning practices, such as our unique NetX solution, which is widely used within the telecoms industry.

We work across the entire mobile and wireless industry, providing training to Service Providers, Equipment Vendors and Network Analysis Solutions. We also support technology training globally for Law Enforcement and Security Agencies. We continually surpass our customers’ expectations and are recognized for our ability to innovate.

Delivery options:

Individuals

Our Online Anytime Package offers a complete portfolio of telecoms training courses, whilst also providing the flexibility to learn at a time and place that suits you.

Teams and Enterprise

If you are looking to source team or organization level training, we can provide solutions that are tailored to your needs and delivery requirements, including:

**LiveOnsite**
- We come to your place of work.
- International face to face training.

**OnlineAnytime**
- Video based training 24/7.
- Study whenever you want.

**LiveOnline**
- Instructor-led virtual classroom.
- Training without the travel.

We can also support by providing dedicated and branded learning academies... as we have done for many global organisations.
Online **Anytime Package option:**

Our Online Anytime Package provides a cost-efficient training solution for individuals, teams and organizations. The package option provides unlimited access to the Mpirical Online Anytime portfolio of content, with over 45 courses currently available. New content is continuously released and for those people within their 12-month license term, this content will be immediately accessible.

- Over 280 hours of high quality, video-based training.
- Coverage of the key mobile technologies, including 5G, 4G and IMS.
- Unlimited access to all existing and new content throughout your 12 month license period.*
- Additional resources such as access to NetX, reference documentation and trainer support.
- Available for individuals, teams and organizations.

*For a small additional fee, you can add our Fast Track Telecoms MBA and 2min On portfolio to the package.

**Our 5G Training**

5G training requirements are gathering pace; we can support you in this change. Ranging from Beginner to Advanced level training, all of our 5G courses are created in line with the 3GPP standards. They are also accredited by the ITP (Institute of Telecommunications Professionals) and provide CPD (Continuing Professional Development) learning credits.

Our courses are designed to deliver relevant, concise and accurate training to a range of job roles and technical levels. We can offer several courses and learning resources that are centred around 5G; find out how we can help you understand the next phase of mobile networks.
NetX is a truly unique network visualization tool, used daily by thousands of industry professionals. NetX features include:

**Interactive Network Map**
- 3GPP standards based.
- Represented technologies include 2G, 3G, 4G, 5G, IMS, CIoT and Wi-Fi.
- All technologies can be filtered for simplification.

**Call Flows**
- Step by step narration of call scenarios and network events.
- Signalling path and media path isolated on the map.
- Mobile Originated and Mobile Terminated call legs.

**Network Procedures**
- Traditional signalling flow representation of call scenarios and network events.
- Covering 2G, 3G, 4G, 5G, IMS, CIoT and Wi-Fi technologies.
- Colour coded protocols for ease of trace analysis.
